DETAILED ACTION

1. In view of the amendment of October 2, 2006, claim 5, 16, 42 have been cancelled, and new claims 44-48 have been added. Claims 1-4, 6-15, 17-41, 43-48 are pending. Claims 14-15, 19-41 are drawn to non-elected subject matter. Claims 1-4, 6-13, 17, 18, 43-48 are examined with merit.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4, 6-13, 17, 18, 43-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 (page 5 of the amendment of October 2, 2006, the last two lines of claim 7), the recitation "the molecular weight of the polymer is in the range of about 10,000 to about 300,000 daltons" is considered indefinite. Applicants must recognize that a polymer having the same molecular weight can be characterized by a number-average molecular weight and/or a weight-average molecular weight. Without such clarification,

Art Unit: 1713

the recited molecular weight of claim 7 is considered indefinite because one of ordinary skill in art would not know which type of molecular weight property are being referred to.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.

Art Unit: 1713

3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
6. Claims 1-13, 17-18, 43 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Fink et al. (US 4,542,175) for the reasons adequately set forth from paragraph 7 of the office action of May 5, 2006.

Applicant's arguments filed October 2, 2006 have been fully considered but they are not persuasive. Applicants argue that Fink et al. are silent on the molecular weight range being claimed. However, both Fink et al. and the molecular weight as claimed are silent the type of molecular weight being disclosed or claimed. Since Fink et al. (abstract) disclose a molecular weight of at least 500,000 which can be a weight average molecular weight, and that a weight average molecular of a polymer is generally higher than the number average molecular weight of the same polymer having a molecular weight distribution that is skewed toward high molecular weight portion of the molecular weight distribution of the polymer, the examiner has a reasonable basis that the molecular weight properties as claimed is inherently possessed in Fink et al. Since the PTO does not have proper means to conduct experiments, the burden of proof is now shifted to applicants to show otherwise. In re Best, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977); In re Fitzgerald, 205 USPQ 594 (CCPA 1980).

Art Unit: 1713

In view of the 112 rejection set forth in the instant office action, the 102-3 rejection for claims 1-13, 17-18, 43 is proper and adequately explained for the reasons set forth above.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
